Treksta Philosophy

**Supporting Joyful Activities with Innovative Outdoor Products,
We Contribute Ourselves to Promote Human Health and Life Extension.
We Create the World's Leading Outdoor Company with This Mission.**

TECHNOLOGY

Treksta developed nestFIT technology by measuring the natural curves and the contours of 20,000 individual feet. We've used that data to create the shoes that will cradle the feet naturally; that gives you the protection for your feet with the unfettered feeling of being barefoot.

GORE-TEX offers 25% better moisture permeability compared to existing materials. GORE-TEX footwear offers better moisture permeability and perfect water-proofing, allowing you to keep your feet dry and comfortable in tough indoor/outdoor activities.

Replacing shoe laces with steel wires, BOA allows you to put your shoes on by simply buttoning them. The Boa Lacing System provides custom comfort with smooth and even closure in the quickest way. The Boa Fit System is the most revolutionary closure system out in the market. Exceptionally durable and light weight reels combine with aircraft grade stainless steel laces to provide smooth, even closure for a secure, comfortable and truly customized fit.

Hypergrip is a global leading outsole brand in high performance rubber soles for outdoor, military and athletic markets. Since 1988, HyperGrip has been producing the most advanced outsoles with the latest equipment and designs, which equipped with the world's best production facilities and more than 40 R&D experts in the field. HyperGrip continues to revolutionize the outsole industry with its up-to-date data and information.

COMBAT BOOTS, WATERPROOF AND BREATHABLE MILITARY

Technology & Feature

- Full Grain Leather (Thickness : 2.0mm ~ 2.4mm)
- Embossed Full Grain Leather (Thickness : 1.2mm ~1.6mm)
- Nylon upper
- GORE - TEX
- Length : 8.5 inch
- Phylon + Rubber Outsole - HYPERGRIP
- Outsole No : TAM-08
- Weight (US 8.5) : 1,350g prs.
